

ENVIRONMENTAL POLICY

KS Environmental Pty Ltd is committed to the sustainability of our natural resources and the promotion of environmentally responsible practices. At all times where practical and possible we will endeavour to reduce our environmental impact and help our customers reduce their carbon footprint.

KS Environmental is committed to:

- Complying with all environmental regulations, standards and requirements associated with our activities.
- Actively promoting and encouraging the adoption of environmentally sustainable work practices within our business and the wider community.
- Responding to the environmental concerns of our customers and the communities in which we operate.
- Continuous active involvement with key governmental and industry forums to help set benchmark standards in protecting our environment.
- Prevention of pollution and contamination of the natural environment in all businesses.
- Where practical undertaking research and development (R&D) to improve environmental outcomes.
- Actively maintaining and promoting our commitment towards an Environmental Management System based upon ISO 14001 throughout the business.

Compliance:

Compliance with this policy is the responsibility of all KS Environmental employees.
